

What Can You Do

- 1) Educate yourselves about the true nature of the threat.
- 2) Assign someone within your group to do a deep dive on this so you begin developing an internal expert on this material.
- 3) Study the "Usual Responses" document.
- 4) Begin sharing this information with close friends and selected others individually. Then in very small groups. Learn from these encounters, and encourage them to challenge you.
- 5) Study Insurgencies and Counterinsurgencies. Understand that LOCAL POLICE are the tip of the spear, and this problem will be solved by citizens at the LOCAL level.
- 6) Know the ideological literature when you see it (Qutb, Maududi, etc). Possession of this material may change the threshold for "reasonable suspicion" and "probable cause" for law enforcement.
- 7) Identify key individuals in your community who are likely to be open to listening to this information. Prepare yourself. Practice. Give the presentation. Encourage them. Follow up.
- 8) Identify key Muslim Brothers and MB organizations in your community.
- 9) Develop a small group of like-minded patriots who have studied and understand the threat. Strategize to regain control of your community.
- 10) Do NOT over-organize. Think like the enemy. Be fluid.
- 11) Do not discuss your strategy publicly.
- 12) Know your allies.
- 13) Consider joining a grassroots organization – locally and nationally (ACT! For America for instance).
- 14) Those in the community who are assisting the enemy (wittingly or unwittingly) should be exposed. This can be done in a number of ways. Consider spending time recruiting/educating a member of the local media – especially a young, aggressive reporter from the local paper.
- 15) Put the heat on those elected officials helping the enemy. Be aggressive. Take a crowd to a city council meeting and demand action. This is one tactic that works.
- 16) Push back at every turn. Do not allow any compliance with Shari'ah at any level.

- 17) Study the foundational principles of America, the Declaration and the Constitution. We must know the enemy AND we must know ourselves.
- 18) Create an education campaign for the community that stresses TRUTH and FACTS.
- 19) Engage your local police department and city attorney on this issue. When speaking with attorneys ensure you keep your language focused on Islamic LAW and that it is diametrically opposed to Article 6 of the US Constitution.
- 20) Engage leaders of local churches and synagogues.
- 21) Initiate a relationship with a key member of your local town council, your state representative/senator, and your US Congressmen and Senators. Go slowly. Don't give them the entire block of information in one sitting. Ask them the questions – act concerned not over-the-top. Remain objective and UNEMOTIONAL. Be consistent.
- 22) Speak to the leadership of your state National Guard about the Islamic Movement.
- 23) Learn what is going on at the Islamic Schools and Mosques in your community. Request to see the teaching materials.
- 24) Attend functions at the local college when someone speaks truthfully about Islam and observe the reaction.
- 25) Go to the local mosques and ask them if you can speak at Friday prayers and share the Gospel with the attendees.
- 26) Engage your local FBI Field Office and ask them about the amount of training they receive on the Muslim Brotherhood, Islamic Doctrine, and the Islamic Movement in the U.S. and across the globe.
- 27) Know that if you are effective, there will be push back from the other side – the MB. Have a TEAM assembled. Don't go it alone. Remember to target the good guys who are helping the bad guys first. If you go after a Muslim Brother to create a public issue, get help from someone with a deep level of knowledge on this and plan well. The MB has an entire machine ready to pounce on you. Don't give them the opportunity.
- 28) Remember – we are at war. Act like it. You are part of a resistance movement, not a social club.
